

TCI® RollStop® For 2010 Chevy V6 & V8 Camaros

Drivetrain innovator takes 2010 Chevy Camaros to the next level of street/strip fun with a custom-tailored RollStop® package

With the introduction of the 2010 Chevy Camaro, the aftermarket has been searching for new ways to make this good-looking, yet powerful machine even more fun than it already is. One of these companies looking to increase the “fun factor” of this impressive machine is TCI®, who recently introduced a new RollStop® for 2010 Chevy V6 and V8 Camaros that makes doing a burnout in your new street machine both fun and impressive.

Designed to lock the front wheels for impressive burnouts and drag strip staging, this package bolts directly on and includes the hard line, fittings, wire, connectors and everything needed for a professional-looking installation. Also included is a precision micro-switch that instantly releases the front brake and is able to be installed anywhere in the car. With a hard line that is pre-bent for added convenience, installation of this custom-tailored package can take less than two hours and can be done without any modifications to the vehicle’s brake system.
