

## **FAST™ XFI™ For 2011 Ford 5.0L Mustangs**

### **FAST™ brings the highest level of fully programmable EFI performance to the 2011 Ford 5.0L Mustang**

The new FAST™ XFI™ System for the 2011 Ford 5.0L Mustang replaces OEM controllers with the first aftermarket programmable race electronic fuel injection system available for the Coyote engine. It is easy-to-install, simple-to-tune, boost and nitrous friendly, and capable of performance that will blow your mind and leave your competition in the dust. The XFI™ precisely balances fuel and spark, allowing you to fine tune like never before so that you're able to set your own parameters and experience the ultimate in fuel injection technology.

With an engine-specific wiring harness featuring clearly labeled connections, installation is a snap. Once installed, simply connect to a Windows PC, and use the easy-to-navigate C-Com® software to completely configure your new system. C-Com® allows you to tune your engine and data log all parameters in real time. These updated features include field flashable capabilities that enable you to download the latest software updates via email or directly from the FAST™ website without ever removing the XFI™ from your vehicle.

The XFI™ System sets itself apart from the competition with its revolutionary Qwik Tune™ Technology. Qwik Tune™ lets you preprogram up to four different performance tunes. With the flick of an in-car switch, you can instantly switch between your customized settings. Drive to the drag strip using your "street" tune, and then flip your Qwik Tune™ switch to blow away your competitor with your "all out racing" tune. The XFI™ EFI system can even control up to 4 stages of nitrous with an optional power adder harness so you'll never get left behind at the track again. Other features include on-board diagnostics, EZ Test™ Indicator Lights, five bar MAP sensing and controls for your torque converter. The XFI™ also offers enhanced data logging capabilities and memory for analyzing up to eight additional monitored inputs.

The XFI™ for 5.0L Mustangs is available in all optional XFI™ formats, including the standard XFI™, Intelligent Traction Control™, and XFI™ with 16 Injector Drivers or Internal Data Logging. It is also available as a complete EFI Crate/Transplant Engine Management Kit, an XIM™ Kit and an XIM™ Standalone Coil-On Plug Ignition Kit.

For more information about the FAST™ XFI™ for 2011 Ford 5.0L Mustangs or any other FAST™ product, call us at 1-877-334-8355, or visit us online at [www.fuelairspark.com](http://www.fuelairspark.com).

**Disclaimer:** In order for the FAST™ XFI™ to work on the 2011 Ford 5.0L Mustang, the cam phasers must be locked in place. Also, the OEM electronic throttle body cannot be used. A mechanical throttle body will have to be adapted.

#### Quick Summary

**Product:** FAST™ XFI™ for 2011 Ford 5.0L Mustangs

**Part Number:** #301014 (EFI Crate/Transplant Engine Management Kit); #301317 (XIM™ Kit); #3013172 (XIM™ Standalone Coil-On Plug Ignition Kit); **For Individual XFI™ Components**
