

## Inglese™ 4-Carb Weber Induction Linkage Kits Deliver Supreme Versatility

**New linkage kits offer complete systems or hundreds of individual components to fit virtually any multi-carburetor or throttle body application**

Finding just the right parts for your Weber-carbureted induction system has always been a challenge – until now. The new Inglese™ 4-Carb Weber Induction Linkage Kits provide all the pieces to make your throttle system work perfectly and look great. Inglese™ offers hundreds of parts to provide correct linkage geometry to avoid potential binding conditions. Offered either in the standard anodized finish or an optional chrome finish for added impact, the Inglese™ throttle components are precision-designed for perfect operation and are sold individually or as kits.

The Inglese™ 4-Carb Weber Induction Linkage Kits are pre-engineered specifically for Weber carburetion rather than generic applications and can be purchased as complete systems, including Weber linkages, roller bearing bell cranks, hardware and link bars. They are easy to install and corrosion resistant to deliver years of perfect service. For anyone building a custom Weber carb induction system, there is no better place to find just the right pieces to fill your need.
