

FAST[™] LSX_R[™] 102mm Intake Manifold for LS7

Revolutionary new intake manifold maximizes the performance of GM LS7 engines

The LS7 may be a powerful engine platform, but when has that ever been enough for the performance enthusiast? Now GM LS manifold technology has been completely reinvented. The engineers at FAST[™] teamed up with the airflow specialists at RHS® to develop the all-new LSX_R[™] 102mm Intake Manifold for raised rectangular port GM LS7 engines. Recent testing by Katech Performance produced gains of 16 horsepower and 18 ft/lbs of torque at the flywheel (versus the stock intake) on a LS7 with a mild performance cam, Big Mouth 102mm Throttle Body[™] and a Killer Bee intake. Testing at the School of Automotive Machinists on a 500c.i. LSX engine with LS7 heads netted even more impressive gains of 26+ rear wheel horsepower.

Following the path chartered by the original FAST[™] LSX[™] Gen III Manifold, the new LSX_R 102mm Intake Manifold features a removable runner, modular design that allows for easy disassembly and porting, including the ability to remove individual runners for modification. Extensive testing also led to a runner design that is longer yet much less restrictive, yielding both torque and power gains, and a larger 102mm air inlet to increase flow over the stock intake. While the LSX_R[™] 102mm air inlet is perfectly suited to the FAST[™] Big Mouth 102mm Throttle Body[™], it can also be used with stock or aftermarket 90mm or 92mm throttle bodies.

The LSX_R[™] is constructed from a proprietary advanced polymer material that has been burst tested to withstand 67 psi of boost. In addition, this polymer material offers a host of benefits over aluminum aftermarket intakes, including lighter weight, strength and improved heat dissipating characteristics. Other features include integrated nitrous bungs and perfect bolt-on fitment that allows use of factory accessories without modification or clearance concerns.

For more information about the FAST[™] LSX_R[™] 102mm Intake Manifold or any other FAST[™] product, call us at 1-877-334-8355, or visit us online at www.fuelairspark.com.

Quick Summary

Product: FAST[™] LSX_R[™] 102mm Intake Manifold for LS7

Part Number: #146202

Features & Benefits:

- Intake manifold designed for LS7 raised rectangle port heads
- Gains of 16 + hp on stock displacement engines & 26+ rwhp on larger cubic inch engines yet retains all factory fitments
- 3-piece modular design with removable runners for easy disassembly & porting
- The 102mm throttle body intake diameter works with 90, 92 or 102mm bodies for high flow with minimum restriction
- Advanced polymer material is strong, lightweight, easy to modify and keeps intake charge cool for power enhancement
