

FAST[™] EZ-EFI[®] Fuel 1972-1991 Jeep CJ/YJ 4.2L, 6-Cylinder Kits

Memphis, TN – The latest evolution of the entry level, self tuning Jeep EFI system from FAST[™] maintains all of the functionality and ease of use of the original, with improvements to the throttle body, hand-held, electronics and harness.

The next generation of the world's simplest self tuning fuel injection system for older Jeep applications is here. The FAST[™] EZ-EFI[®] Jeep kit is designed specifically for 1972-1991 Jeep CJ/YJ 4.2L, 6-cylinder applications and includes a linkage kit, enabling plug-and-play compatibility with Jeep accelerator cables and transmission kickdown cables. The Jeep systems also feature a new die cast and black powdercoated, two-injector, four-barrel throttle body with an integrated fuel rail. It provides even better fuel distribution and more airflow than the original. Based on the EZ-EFI 2.0[®] Fuel + Ignition design, it is made in the USA and utilizes a secondary idle stop to help with idle adjustment.

A color touchscreen hand-held also features a new-and-improved Setup Wizard. The intuitive program asks a few basic questions and then the EZ-EFI[®] Fuel System tunes itself as the user drives either on the highway or off-road. No laptop or previous tuning experience is required. The hand-held itself features a variety of display dashes, a clean and easy-to-use interface and an LED indicator that can alert users to any error (including overheating) or be used as a shift light. Finally, an updated wiring harness features premium loom, added protective fuses and a streamlined design, while the ECU hardware has been upgraded to provide added protection against electrical/ignition noises and hardware damage. FAST[™] EZ-EFI[®] Fuel kits for Jeep applications are available in throttle body injection designs with or without fuel pumps.

#43406

Quick Facts

Product: FAST[™] EZ-EFI[®] Fuel 1972-1991 Jeep CJ/YJ 4.2L, 6-Cylinder Kits

Part Number: #43406 (Jeep Base Kit); #43407 (Jeep Master Kit, In-Tank Fuel Pump); #43408 (Master Kit, Inline Fuel Pump)

Street Price: Call for Pricing

Social Media Pitch: New FAST[™] EZ-EFI[®] Fuel self tuning systems for Jeeps update original version & maintain ease of use + allow plug-and-play compatibility

Features & Benefits:

- Includes linkage kit for compatibility w/ Jeep accelerator & trans kickdown cables
- 2-Injector, 4-barrel throttle body provides better fuel distribution & flows more air than original
- Setup Wizard asks a few basic questions & tunes as user drives w/out requiring a laptop
- Easy-to-use hand-held features a color touch screen w/ multiple display dashes & an LED indicator for a wide variety of uses
- Updated wiring harness utilizes premium loom, protective fuses & a streamlined design
- Offered in throttle body injection designs with or without fuel pumps
