### COMP Cams® Xtreme 4x4 Camshafts for Jeep/AMC 4.0L 1999-2006 Engines

**Memphis, TN** – Introducing two new camshafts for the Jeep 4.0L 1999-06 applications that are each designed for a specific use, providing more power for EFI engines with both stock and aftermarket cylinder heads.

The Jeep 4.0L is used for many different tasks, from daily driving to rock crawling and even hill climbs. COMP Cams® has released grinds that tailor to some of the most common applications of this proven motor. These camshafts feature new lobe designs specific to the 4.0L that allow for more duration and valve lift within the constraints of the 4.0L design. This results in better torque and mid-range power for EFI applications.

With one grind aimed at builds utilizing stock cylinder heads and valve springs (No Springs Required) and one designed for aftermarket heads, you can choose the best cam for your specific setup that provides maximum responsiveness with simple tuning.

Part #163-201-5

#### Quick Facts

**Product:** COMP Cams® Xtreme 4x4 Camshafts for Jeep/AMC 4.0L 1999-2006 Engines  
**Part Number:** See Application Chart On Page 2  
**Street Price:** \$240.73

**Social Media Pitch:** Designed for stock and aftermarket cylinder head EFI applications, these new Xtreme 4x4 camshafts get the most out of Jeep 4.0L 1999-06 engines.

#### **Features & Benefits:**

- Xtreme 4x4 lobes provide maximum responsiveness and power with mild tuning
- Grinds designed for EFI stock and aftermarket heads
- More duration and valve lift result in better torque and mid-range power
