FAST® EZ-EFI® -6AN Fuel Return Line Fitting

Memphis, TN – Easily add a return fuel line port to your fuel tank with the EZ-EFI® -6AN Return Fuel Line Fitting from FAST®.

If you find yourself making the switch from a carburetor to fuel injection, you will need to add a return fuel line port to your fuel tank. Thanks to FAST®, the leader in Fuel Air Spark Technology, you can now do that with only hand tools and no welding. The FAST® EZ-EFI® -6AN Fuel Return Line Fitting is the perfect way to easily add a -6AN fitting to any tank without welding or having access to the inside. By simply drilling a 1/2" hole, the fitting installs against the tank from the outside. By then compressing the fitting's aluminum body, much like a rivet, a mechanically secure, fuel tight seal is formed.

Compatible with any tank material up to 1/4" thick, installing the fitting does not require access to the inside of the fuel tank. While primarily intended for fuel return, the fitting has a number of other potential uses such as oil return, power steering line return, vent, etc. The fitting assembly includes a billet aluminum body, an anodized -6AN fitting and a Grade 8 installation bolt for your convenience.

Quick Facts

Product: FAST® EZ-EFI® -6AN Fuel Return Line Fitting
Part Number: #307031
Street Price: \$24.95
